Maximum holiday enjoyment: Carado is delivering numerous innovations with the 2025 model year. In the camper van series, the new CV602 floor plan expands the product range. The CV600 and CV640 are now also available with the pro+ package, while the CV590 4x4 is being presented as a special EDITION25 model. For the first time, the entire van series is available with the pro+ package. In addition, improvements have been made to the chassis of all models.

#### **The camper van highlights: functionality meets comfort**

Suitable for everyday use and always ready for the next vacation - that's what the CV series from Carado stands for. With the pro+ package for the CV600 and CV640, travellers can increase the comfort of their campervan. This includes, among other things, the swivel bathroom. This design allows a kind of room division through a swivelling wall, which means the bathroom can quickly be converted into a shower. In the rear of the vehicle, a transverse shelf provides additional storage

space. In the front of the camper vans, the new panoramic window lets a lot of light into the living area. The indirect lighting creates a cozy atmosphere in the evening. An optional pop-up roof expands the sleeping options and is ideal for groups and families.

The CV602 is the new camper van floor plan for the 2025 model year. The seating area and bathroom are similar to the smaller CV540 model and allow for single beds to be placed lengthways in the rear of the vehicle. Ideal use of space in just 599cm. A pop-up roof is also available for this model.

The CV590 4x4's all-wheel drive remains the heart of the vehicle. Thanks to its powerful 170 bhp and 4x4 drive, it can effortlessly manoeuvre through even the most difficult terrain and is prepared for any weather. New features of the EDITION25 include the widening jaws in the rear, which means that even taller people can comfortably fit in the rear bed. A rear window that can now be opened improves ventilation. The cooker and sink are installed in the 2025 model year, similar to the Carado motorhomes.

### **Greater efficiency thanks to new chassis features**

Fiat-based vehicles benefit from higher-quality standard equipment and improved driver assistance systems. There are also aerodynamic exterior mirrors. The new front design with modern bumpers and radiator grille gives the look a fresh new look.

In the Citroen-based motorhomes, the aerodynamic exterior mirrors and the new front design are complemented by an 8-speed automatic transmission. This guarantees an even smoother driving experience.

In addition to the new driver assistance systems and packages, increased standard equipment and the 8-speed automatic transmission (except for the CV590), Ford basic models receive a further upgrade: the towing capacity is increased to 2 tonnes.

### About Carado

Carado GmbH is a company of the Erwin Hymer Group. Carado offers durable and well-designed motorhomes, vans and camper vans with the best price-performance ratio in the entry-level segment. These impress with practical and solid functionality, high quality "made in Germany" and modern design with clever details. They are equally characterized by the highest reliability and safety as well as comfort and diversity. Carado is the brand for families, singles, couples and for all people who are looking for a home for their time on the road, a place to feel good, with which they can.
